In 2000, the Bruno Family decided to acquire 4 acres to establish an onsite nursery. Tired of getting droopy, half-dead plants, bushes and shrubs from their suppliers, they made the decision to open their own nursery so they could take control of the quality of the plants they sell and plant on properties.

Over the past couple of years, they decided to expand their offerings and have an amazing assortment of pots, garden décor, and many other fun yard items.
